PROFILE

Aerospace Engineering student with hands-on experience in ADCS, Propulsion, CFD and Electronics. By contributing to international settings, I am always ambitious, motivated, eager to learn and reach excellence.

EDUCATION

- | | |
|---|---|
| Universidad Europea de Madrid
<i>Bachelor's Degree in Aerospace and Aircraft Engineering</i> <ul style="list-style-type: none">Relevant Coursework: Aerospace Technology, Navigation Systems, Thermodynamics and Heat Transfer, Space Vehicles. | Sep. 2023 – Present
Madrid, Spain |
| Kyushu University
<i>Exchange Year in Mechanical and Aerospace Engineering</i> <ul style="list-style-type: none">Relevant Coursework: Fluid Mechanics I and II, Linear Circuits I, Japanese Industries, Japanese Economy. | Oct. 2024 – July 2025
Fukuoka, Japan |

EXPERIENCE

- | | |
|--|---|
| ADCS of a CubeSat
<i>Satellite Club S-ART Project, Universidad Europea de Madrid and Universidad Rey Juan Carlos</i> <ul style="list-style-type: none">Currently contributing to the development of a simulator for a nanosatellite (Cubesat) in LEO using Python, MATLAB and Simulink for the detection and characterization of electromagnetic emissions associated with coronal mass ejections (CMEs). | Dec. 2025 – Present
Madrid, Spain |
| Structure and CFD for a Hybrid Rocket
<i>Rocketry Club Planet Q, Kyushu University</i> <ul style="list-style-type: none">Contributed to the launch of the Tadori-Tadori paraffin-nitrous oxide powered hybrid rocket by handling its CFD simulation using Ansys Fluent and OpenRocket for the Izu-Oshima joint launch experiment. | Nov. 2024 – July 2025
Fukuoka and Ōshima Island, Japan |
| Propulsion and Avionics Engineer
<i>Rocketry Club Zenit, Universidad Europea de Madrid</i> <ul style="list-style-type: none">Contributing to the development of the test bench and scaling of a solid rocket powered by potassium nitrate and sorbitol using Arduino to be able to compete in the European Rocketry Challenge (EuRoC). | Feb. 2024 – Present
Madrid, Spain |
| Subdelegate and Class Representative
<i>STEAM School, Universidad Europea de Madrid</i> | Oct. 2025 – Present
Madrid, Spain |

PROJECTS (SELECTED)

- | | |
|--|-----------------------------|
| ESA Clean Space Days 2026 <i>GNC, Autonomous Space Systems, Public Speaking</i> <ul style="list-style-type: none">Selected presenter at ESA Clean Space Days 2026 - one of 9 abstracts selected for poster presentation. Research focused on GNC's SMC-based attitude synchronization for non-cooperative debris removal using PROBA-3 spacecraft data, framed within ESA's ADRIOS mission requirements. | 29 Jun. 2026 – 03 Jul. 2026 |
| Fixed-Wing UAV <i>MATLAB, Simulink, XFLR 5, eCalc, CATIA</i> <ul style="list-style-type: none">Leading one of two groups for the development of a fixed-wing UAV designed for night-time surveillance of cattle fields in Northern Spain by developing a reliable flight simulator for dynamic subsystems, and implementing a control loop using a PID controller on MATLAB and Simulink. | Nov. 2025 – Present |

TECHNICAL SKILLS AND LANGUAGES

Programming Languages and Software: Python, MATLAB, Simulink, Arduino, Ansys, CATIA, SolidWorks, Fusion 360, XFLR 5, Multisim, MySQL, C, Git, C++.

Languages:

- English: advanced.
- Spanish: professional working proficiency.
- French: native.
- Japanese: advanced.
- Arabic: native.

Soft Skills: resilience, teamwork, time management, problem-solving and critical thinking.
